We are looking for a **Senior Resident Spacecraft I&T Engineer** to be permanently based in Argentina for a minimum two years duration contract.

Job Responsibilities

Provide on-site monitoring of platform/spacecraft construction contract, including coordination between Customer's program, technical and quality managers, and satellite manufacturer personnel. Participate in contractor's on-site reviews, technical interchange meetings, problems resolutions, and tests and status reviews. Review contractor's schedules and deliverable documentation including test plans, test data and test reports.

Experience/Skills Required

Knowledge of satellite development, manufacturing and testing processes, at platform, payload and spacecraft levels. Understanding of quality engineering, and verification methodologies. Experience with contract management, including SOW, Design Reviews, and integrated program schedule. Good communication skills including writing and verbal communications. Self directed and motivated.

The Resident AIT Engineer should be able to communicate at all levels and have ideally some satellite programs monitoring experience. English (and ideally Spanish) languages are mandatory. French language is a plus.

*Run by space professionals, Spacelinks provide specialist recruitment in the space and defence industry. Spacelinks are acting as a Recruitment Agency with regards to this position. When applying, please send your CV as a Word document to cv@spacelinks.com and please indicate your current salary and earliest date of availability. Make sure to include the vacancy number **SL-02701** in the subject line as we use email filtering.*
