Avionics Technical Manager

Job profile:

Our client is a recognized system integrator and supplier of small and micro-satellites. Their Space Systems Division is developing advanced on-board data handling systems and interface electronics for satellites. Having large projects coming in soon, they are looking for an Avionics Technical Leader whose job will be to build up and lead a team in charge of future electronics developments and to draw up roadmaps for future business.

Qualifications/Skills:

Required

- 5 to 10 years experience in electronics/avionics engineering (particularly data handling) within the space industry
- Familiarity with ECSS standards
- Experience in working with ESA as a Customer
- Ability to lead a team of engineers
- Fluent in English, written and spoken

Desirable

- Familiar with requirements handling (DOORS), requirements-based system architecture and design, development and verification
- Competent in the areas of radiation analyses, EEE components, EMC
- Experience in VHDL coding is a plus

Benefits:

- Attractive salary commensurate with experience and competence
- Pension
- Relocation costs
- 'Foreign expert' tax benefits (for non-Swede applicants)
- Additional life and income insurance

Please note: candidates not prepared to relocate to Sweden need not apply.

*Run by space professionals, Spacelinks provide specialist recruitment in the space and defence industry. Spacelinks are acting as a Recruitment Agency with regards to this position. When applying, please send your CV as a Word document to cv@spacelinks.com and please indicate your current salary and earliest date of availability.
